Reasons for Allowance

Allowable Subject Matter

2. Claims 4-7, 14-18, and 30-19 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The present invention is directed towards a method of embedding auxiliary information within original data. Each independent claim identifies the uniquely distinct feature of "receiving auxiliary information that is independent of the original data; changing the auxiliary information based on the original data and embedding the changed auxiliary information within the original data." The closest prior art, Barton (U.S. Patent No. 5,646,997) discloses a method of embedding metadata into a series of video frames. The applicant's arguments were persuasive in disclosing that Barton's design does not change the auxiliary information based on the original data (data contained within a series of frames in Barton's design) but rather embeds the unchanged metadata directly into the series of frames (original data).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
